

A construction site at sunset. In the foreground, two construction workers wearing hard hats are silhouetted against the bright orange and yellow light of the setting sun. They are standing on a steel framework of a building under construction. In the background, numerous vertical rebar rods rise against a deep blue twilight sky. A large, semi-transparent white arrow graphic points upwards from the bottom center towards the top of the frame, partially overlapping the workers and the sky. The overall mood is one of industriousness and progress.

“ WE BELIEVE THAT AN INTELLIGENT, INNOVATIVE, AND ANALYTICAL PROJECT CONTROLS PROGRAM PLAYS A VITAL ROLE IN ENSURING THE OVERALL HEALTH OF A CONSTRUCTION PROJECT. WE JOIN EACH PROJECT AS PART OF THE TEAM, WITH A VESTED INTEREST IN THE SUCCESS OF THE PROJECT AND THE MISSION. - DAVID J. HATWELL, CEO

THE AEGIS DIFFERENCE

Relentless

We go above and beyond to exceed expectations ensuring our clients and employees feel and know they are our top priority.

Entrepreneurial spirit

Our natural pace is one step ahead, and, like the mighty rhino, we charge forward to create solutions.

Trusted partner

We stand by you, providing the confidence that everything will be done right.

Extended family feel

We always look out for our clients; they are part of our extended team, and we treat them with the highest level of care and respect.

High-spirited fun

We're vivacious and love to bring fun to every project, infusing positive energy into everything we do to create meaningful relationships.

Project controls aren't just part of what we do – it's all we do. We provide unrivaled project controls services. It is the DNA that defines us. With decades of experience, Aegis provides the construction industry with best-in-class project controls, professional services, and technology solutions.

Our commitment to excellence translates to intelligent, innovative, and analytical project controls solutions that support clients from every sector. Our experience gives us a deep understanding of the nuances and complexities of your projects.

Our solutions begin at project conception and carry through every phase of the process, extending to post-construction and beyond. We are a true partner, an extension of your own team, with a vested interest in the success of the project.

We are equally passionate about problem-solving and the pursuit of solutions as we are about creating meaningful relationships with our partners. Our passion for what we do keeps projects charging forward.

BE THE RHINO

PROUD SUPPORTER OF RHINOS EVERYWHERE

When lightning strikes the African plains, the rhino, recognizing the threat to its home, charges toward the lightning and stomps out the fire. The mighty rhino embodies our company. Rhinos lead the way—swiftly identifying and overcoming challenges. That's why every day we aspire to "Be the rhino" for our clients and our company.

Although we look to these mighty creatures for inspiration, today, very few rhinos survive outside national parks and reserves. Poaching, habitat loss, and political conflict are all threatening the survival of the rhino species.

We're proud to partner with several organizations, including the International Rhino Foundation, Conservation Nation, and The Smithsonian National Zoo, working to protect rhinos in the wild.

OBSESSED WITH YOUR SUCCESS

We partner with owners and contractors to deliver high-quality solutions to the construction industry.

PLANNING AND SCHEDULING

CREATING A SCHEDULE AND PLANNING A PROJECT ARE NOT THE SAME.

A plan encompasses the entirety of a project, including the schedule, risks, costs, and resources. The plan is used by all parties to manage the project throughout its life cycle.

WHO WE ARE

Aegis' planning services offer unrivaled expertise to our clients, both on the owner and the contractor side.

With the largest bench of project controls professionals in the country, we assist our clients with the integration of schedule, risks, costs, and resources to provide the highest-level project controls services and a deep understanding of the health of a project.

Our plans help manage projects from concept to completion. Aegis works with the project team to create a plan that includes all phases and scopes of work. From concept to design and from preconstruction to close-out, Aegis is a core part of the project team.

We use sophisticated analysis of project data and leverage proprietary metrics and KPIs to provide the project teams with real-time information about their project's status, risks, and quality.

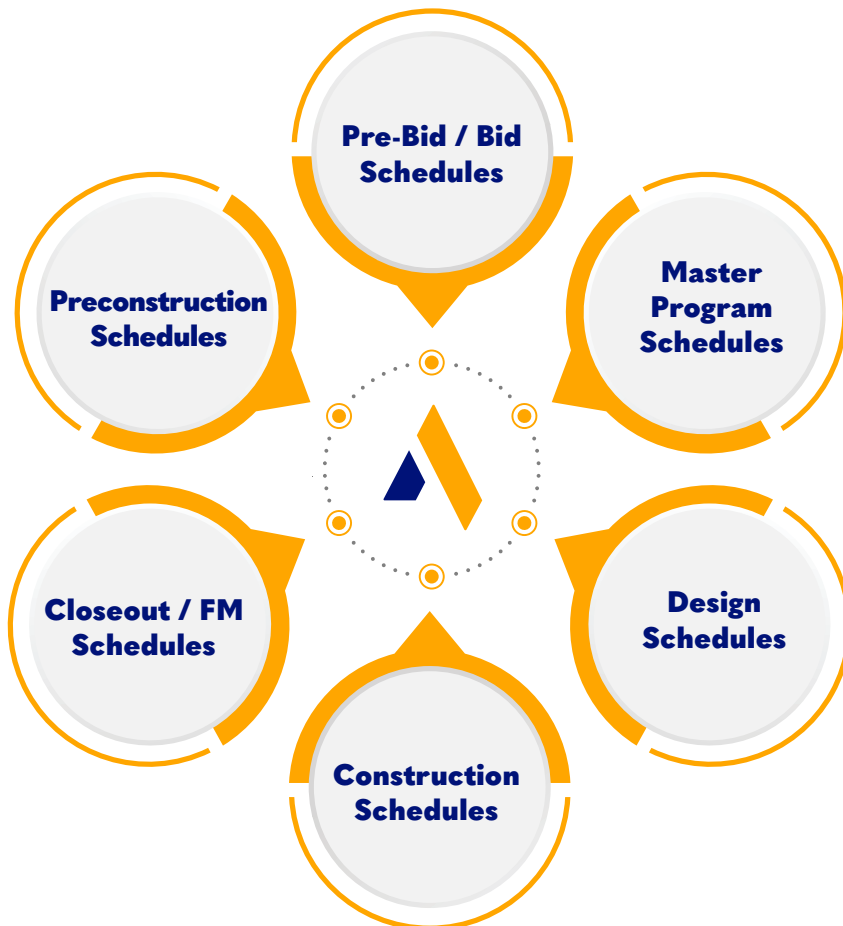

OUR PLANNING & SCHEDULING APPROACH

The goal of Aegis' planning and scheduling service line is to understand, predict, and constructively influence a project's time and resource outcomes.

With decades of experience, Aegis has the processes and procedures needed to execute a successful plan. Our approach combines our proprietary systems and structured approach to planning with the unique nature of each project and program. We invest time to understand the individual requirements of each project, addressing constructibility, resource planning, and collaborating with your team to create the best plan for an on-time and on-budget project.

We often work within an existing project or program and offer enhancements that will bring value to your project through our depth and breadth of knowledge. Aegis can support your program through any or all the phases of a project:

SERVICES

We provide comprehensive project controls and planning services throughout the life cycle of the project. Our depth of experience allows us to quickly understand your needs and to provide you with the support and services your project and team require:

CONTRACTOR SERVICES

- Proposal schedules
- Bid schedules
- CPM schedule development
- CPM schedule analysis
- Progress reporting & analysis
- Fragnets & Time Impact Analyses
- Cost/resource loading
- Payment applications
- Earned value management
- Pull planning
- 4D/Graphical scheduling
- Linear scheduling
- Third party schedule review
- Key Performance Index analysis
- Dashboards

OWNER SERVICES

- Master program scheduling
- Preconstruction planning
- Specification preparation/review
- Design schedule
- Preconstruction schedule
- CPM schedule review
- CPM schedule development
- Fragnets & Time Impact Review
- Cost/resource loading
- Pull planning
- Progress evaluation & reporting
- 4D/Graphical scheduling
- Key Performance Index analysis
- Dashboards

DISPUTE RESOLUTION

AEGIS IS PART OF YOUR TEAM THROUGHOUT THE DISPUTE PROCESS.

WHO WE ARE

Aegis' Dispute Resolution service line is a premier team of construction experts committed to assisting our clients with risk resolution and avoidance strategies, affirmative claims, rebuttal reports, expert witness testimony services, and the timely resolution of disputes on complex construction projects.

We are committed to consistently delivering the best product through robust analysis and a comprehensive understanding of the issues and methodologies. Our solutions result in stronger working relationships between project stakeholders, guiding our clients toward a path of success.

Our team has the depth and breadth of experience necessary to navigate simple and complicated disputes.

Recognized in the fields of schedule delay analysis, cost analysis, loss of productivity analysis, quantification of damages, and expert witness testimony services, our experienced team is fully equipped to provide analytical and advisory services to clients throughout the life cycle of a construction project.

OUR DISPUTE RESOLUTION APPROACH

Using industry-standard methodologies and advanced analytic techniques, we are uniquely positioned to produce demonstrative analyses beyond the numbers and clearly illustrate cause and effect.

We pride ourselves on presenting the best possible supportable position for our clients during and through negotiations. If attempts fail and the eventual result is litigation, we can provide the necessary expert witness testimony and comprehensive support.

We provide clarity into what can sometimes be an opaque process. We involve the client every step of the way through weekly check-in meetings and frequent progress reviews. Our team understands that this is inevitably a stressful process, and we believe that it is important that clients understand the steps involved, the internal and external challenges that exist, and the reasons for our approach. This collaborative and transparent approach allows everyone to be on the same page and can be very effective when trying to reach a resolution with the other party.

SERVICES

We provide comprehensive dispute resolution services, delivering key risk insights and protecting our clients throughout the life cycle of the project. Our team has a strong track record of guiding our clients through time impact analyses, change orders, and litigation by providing thorough mitigation strategies and establishing the best path forward. Our services include:

PRECONSTRUCTION

- Contract review
- Identify, assess, and measure the impacts of potential risks
- Provide risk and dispute avoidance strategies

DURING CONSTRUCTION

- Advisory services
- Third-party neutral representative
- Contemporaneous delay and cost mitigation
- Time Impact Analysis
- Requests for equitable adjustment
- Change order support
- Predictive analytics based on past performance

CONSTRUCTION MANAGEMENT

AEGIS CONSTRUCTION MANAGEMENT SERVICES ARE ROOTED IN PROJECT CONTROLS.

WHO WE ARE

Throughout our history, Aegis has focused on managing time, costs, resources, and risks – Project Controls. Aegis has been at the forefront of the project controls industry for two decades by creating industry-leading best practices and tools to manage our projects.

The evolution to a full-service construction management firm is the next step in helping our customers deliver projects with predictable outcomes and reduced risk.

OUR CONSTRUCTION MANAGEMENT APPROACH

Our approach combines a deep understanding of construction processes, world-class project controls, and our proprietary project analytics technology.

Our team of experts draws on their experience and institutional knowledge to improve existing processes for better, more predictable results. We work with you to understand the specific needs of each project, develop solutions for any phase of project delivery, and create the best plan to protect owners and operators from risk.

The Aegis construction management team uses the project's schedule, cost, resource, and risk data to provide timely, unbiased, and informed decisions earlier in the project lifecycle. We use data and analysis from thousands of our past projects across all market sectors to create valuable comparisons that inform better decisions. This helps us understand and influence a project's cost, risk, schedule, and resource challenges, regardless of the market sector or location.

SERVICES

A successful construction management team manages time, costs, resources, and risk. As the nation's largest project controls company, Aegis has managed those elements for two decades on projects of all types and sizes. Our combination of world-class project controls and experienced construction professionals creates better, more predictable project outcomes at every delivery phase.

GENERAL SERVICES

- Program development
- Concept design development
- Conceptual estimating
- Project screening and delivery options assessment
- Design and construction solicitation management
- Performance-based specifications
- Development of evaluation criteria
- Proposal evaluation and review process

PRECONSTRUCTION & DESIGN PHASE

- Project management plan
- Project controls plan
- Design management
- Site-specific specialty equipment vendor solicitation, management, and design integration
- Early equipment selection and procurement management
- Permit expediting and management
- Reporting and enterprise analytics

CONSTRUCTION PHASE

- Construction administration and management
- Project controls management – schedule, costs, resources, and risks
- Quality and change management oversight
- Construction progress monitoring
- Enhanced commissioning and LEED certification monitoring
- Master project budget monitoring and updates
- Project team and regulatory agency coordination

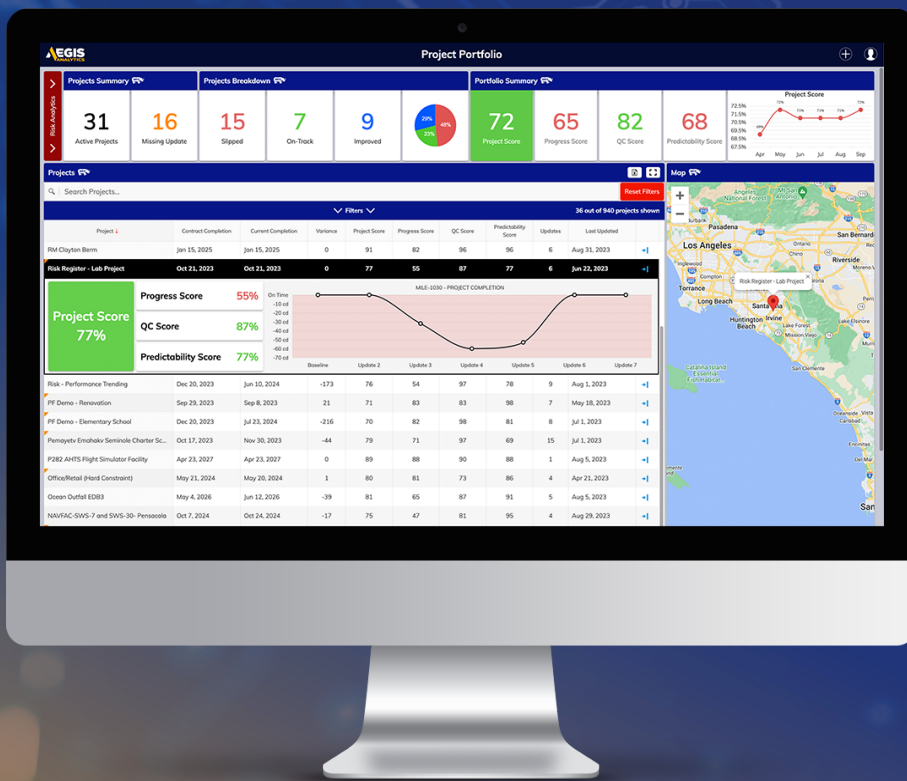

PROJECT CLOSE-OUT PHASE

- Startup and commissioning planning and oversight
- Comprehensive final inspection monitoring
- Guarantees, warranties, and O&M manuals receipt and delivery
- Final account reporting

TECHNOLOGY

OUR TECHNOLOGY SOLUTIONS

Aegis develops technology solutions providing real-time advantages to construction projects.

Aegis Analytics is our custom-built project controls dashboard solution, allowing teams to manage any number of projects in one location.

Schedule analysis, quality control, and comparison software do not have to be complicated. Rubix gives professionals the tools they need to manage schedules.

Primavera in the cloud. The full power of Primavera without any of the technical hassles.
